STORES THREE TT OR TEA TRAYS

HOW DO THE TRAYS FIT?

CHOOSE THE TOOL TRAY SIZE BELOW TO FIT THE SPACE IN YOUR STORAGE:

Storing tools in hard to reach places and in an illogical manner can disrupt the workflow of any garage or workshop. The unique Teng Tools Get Organised System uses tool trays that click together to fit perfectly into your chosen storage solution. You do not have to waste time searching for tools anymore.

Every tool has its own specific place in your toolbox. You can rest assured knowing that any tool you need is easy to find and ready for the task whenever you need it. This creates a more efficient workflow and gives you more time to do what you do best every day.

EVA

TOOL TRAYS

THE ULTIMATE CHOICE IN TOOL ORGANISATION

Teng Tools EVA foam tool trays are the ultimate choice in tool organisation. The 3-colour EVA foam clearly alerts the user when a tool is out of place, so it can be identified immediately. Purchasing replacement tools for tools that simply cannot be found can end up costing a lot of money. Get Organised with Teng Tools to avoid these costs.

If you take pride in your work, take pride in your tools. When tools are stored in an organised manner, you see the results with the increase of efficiency and productivity. When you choose Teng Tools you immediately stand out from the crowd as an individual who is ready to succeed.

CHOICE | CUSTOMISATION | INNOVATION

All things that make Teng Tools the right choice for you.

THE GIRL ON A BIKE

THE DREAM WORKSHOP

In 2017 we broke ground on a mission to build our dream garage. Living in a 2-bedroom end of terrace house, utilising all of the available space was key to enabling us to fit a double garage... no more motorbikes in the dining room and conservatory! Six months later and we had the making of our new haven, soon to become the most used space in the house, but it just wasn't quite there...

Then, 2020 saw us jump in and our dreams materialised. A full Teng Tools set up with eye catching red units and a comprehensive set-up of tools all housed in EVA foam. We got organised and lock-down gave us the perfect gift of time to get it all sorted.

As home hobby mechanics and motorcycle racers we're always in the garage tinkering. Over the years we had built a sporadic collection of odd tools but it was always a hunt to find the one that we needed. That darn 10 mm spanner...

When we're doing a job, whether that's a full two stroke rebuild or simple brake service, knowing exactly where the tools are makes things so much easier. We have everything organised with ergonomics in mind. The most used tools ready at arm's reach, the mobile toolbox is all set to deploy into the trailer for races and the garage set up of our dreams.

We knew our garage kit would be one for life, tools we would spend hours and hours of our lives using so we wanted the best. The thought in design, the precision in manufacturing and the quality of the finish. Going Teng, it was a no-brainer.

You can see a full tour of Vanessa's garage on her YouTube, search "The Girl On A Bike garage tour"

Vanessa Ruck

Lockdown to do list:

- Finish organising the garage ✓
- Getting the tools set up in the best drawer configurations ✓
- Get a new garage hoover to keep things tidy ✓
- Upgrading all security to keep us sleeping sound ✓
- Mowing the lawn, watching the lawn grow and waiting to mow it again... ✓
- Loo roll challenge... as simple as kicking a loo roll into a toolbox... yeah I'll stick to motorbikes! ✓
- Stand admiring our Teng Tools ✓

Vanessa

"SOME CALL IT AN OBSESSION BUT I CALL IT ORGANISED AND THE BEST WAY TO GET A JOB DONE."

TOOL KITS

STAND OUT FROM THE CROWD

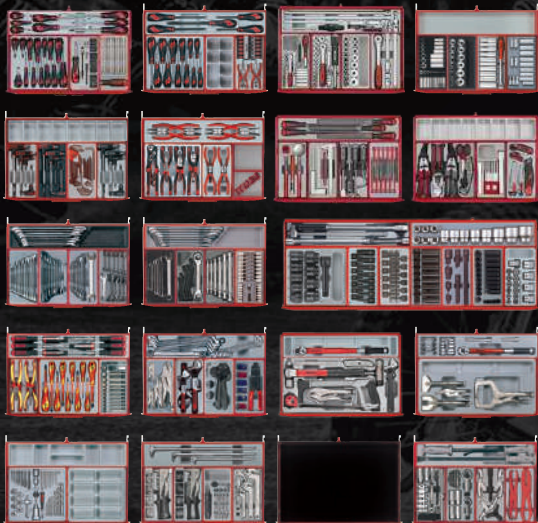

When you are working on your vehicle you take pride in what you are doing. You want the best. Better tools bring better results. When you choose Teng Tools you immediately stand out from the crowd as an individual who is ready to succeed.

Each tool kit has been compiled with the help of technicians from various trades

TOOL KITS

EXCEEDING THE DEMANDS OF PROFESSIONAL USERS

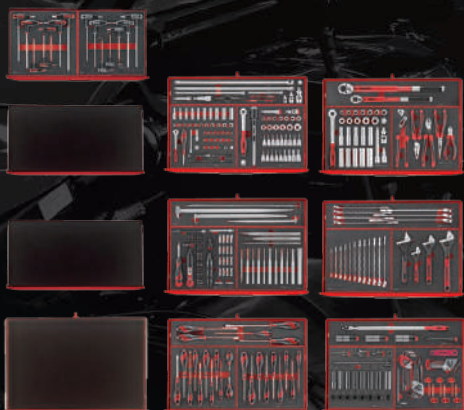

In many activities and situations it is extremely important to be able to quickly check that all tools have been replaced in the correct positions in the tool box at the end of the shift or when the work is completed. EVA foam storage solutions offer a cost effective solution.

- The EVA foam is cut to fit the exact shape of each tool for a perfect fit
- Easily see what tool has been removed. Every tool has it's own place in your kit
- The size and description of every tool is etched into the foam
- Tool kits are available in many shapes and sizes. There is a kit to fit your exact needs

SETTING UP IN SOUTH AFRICA

Pictured from left to right: Graham Webb, Arthur Logan, Harley Nash & Sascha Ruppert

Interview with Harley Nash, one of three founders of Teng Tools ZA, new partner of Teng Tools in South Africa:

Why did you want to start up selling Teng Tools in South Africa in the first place?

We didn't start by selling them, we started by buying them! After we got our hands on our first set of Teng Tools we were amazed with the Get Organised system! The combination of organization and quality is unbeaten in the hand tool industry. Myself, Sascha and Graham all rebuild classic cars/motorbikes and we couldn't believe that Teng Tools weren't more readily available locally. (Basically non-existent) with such a great product we had to get behind Teng tools!

What do you find unique about the Teng Tools brand?

In the Southern African tool market you have two options: either cheap tools with a wide range and low price or high-quality tools with a small range and exorbitant pricing. Our goal was to offer a middle way: a quality but affordable tool brand with a professional range, to eventually change the mindset of the average South African from "buy cheap" to "buy once, but quality".

Who is your plan for launching Teng Tools in South Africa?

Our focus over the last 2 years has been to grow brand awareness by focusing on the Get Organised Concept. In 2020 we can finally start to approach resellers as the preferred general hand/automotive tool brand.

We will test the waters by offering loose entry level hand tools and counter items as an easy buy in to the brand. Then we have the modular tool tray concept for enthusiasts that want to build up their tool set step-by-step and thirdly, professionals that want to get their workshop organised by buying full tool kits. We will find out how the market will react.

What are the best sales arguments you have selling Teng Tools to your customers?

With Teng Tools it's easy to get behind the brand:

1. Get Organised
2. Quality Tools
3. Affordable price
4. Wide range of products.

In an economy where customers cannot afford to spend a lump sum for tool kits, we have found out that the Get Organised concept is key: Build your tool kit step by step and only buy the tool trays you really need. The perfect concept for everyone from petrol-heads to professional workshops.

Has there been anything specific in your co-operation with the Teng Tools that you like or find valuable as a new distributor?

As a distributor, we have realised what a great team Teng Tools is globally, we believe this is what sets us apart from competitors, Teng Tools is a very dynamic company, ready for new ideas and always ready to help. Thank you to all the different distributors that have helped us and answered our questions so far!

PORTABLE TOOL KIT

M1212N1	186100103	1/2" DRIVE	12 Pieces

A good socket set is one of the most important things to have in your tool collection. Do not try and get away with skimping to save some cash in the short term when choosing a socket set. You can guarantee that when you choose Teng Tools you will not be let down!

It wouldn't be a socket set without some sockets! All Teng Tools sockets are developed with the non-slip "Hip Grip" system. This means that the socket grips on the flat surfaces of the nut rather than on the corner preventing damage and slipping. Deep etching makes it easy to identify that 10mm socket at a glance.

SOCKET SET

1/4"

WITH AN ERGONOMIC
DESIGN THAT MAKES
THE RATCHET VERY
COMFORTABLE TO
USE, EVEN IN COLD
ENVIRONMENTS

The most important component of any socket set is the ratchet. Whether it be the 'FRP' fibre ratchet handle with steel reinforcement or the 72 teeth range that gives a working arc of just 5° you really can feel the difference when you hold a Teng Tools ratchet. Service kits are available and are easy to fit so once maintained properly a Teng Tools ratchet can last a lifetime.

SOCKET & TOOL SET

3/8" DRIVE

48 Pieces

With the quality of ratchets and sockets available you do not want to store them in any old box. You need to protect them in a fully organised Teng Tools carry case. Made from fully recyclable plastic material with hard-wearing metal pin hinges these cases are built to last.

The larger cases are supplied with a secure click locking mechanism and a divider that keeps the tools in place when you are on the move. Rubber feet on the base prevent the case from sliding while you are working.

- Regular 3/8" drive sockets 8–21mm & 7/16"–11/16"
- Flip Reverse ratchet & accessories
- Spark plug sockets 16 & 21mm

MEASURING TOOLS

WHEN ACCURACY IS KEY Make the professional choice

Measurement tools are often an afterthought when compiling tools for a workshop, but they shouldn't be. A minute error in measurement is all it takes to ruin an entire project. Invest in quality measurement and layout tools, which will last longer and remain accurate for years to come.

The Teng Tools range of Measuring Tools have been developed by focusing on users requirements across the automotive & industrial sectors. High accuracy, low uncertainty and validated measurement methods come as standard!

PROTECT YOURSELF FROM ELECTRIC SHOCK

MORE THAN A PLASTIC COATING

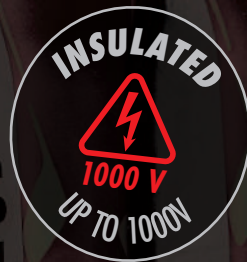

Many standard screwdrivers have handles made of non-conductive material, but this is not a reliable guarantee that the handle is properly insulated. All Teng Tools insulated screwdrivers are designed inside-out for electrical safety but are also manufactured to resist a voltage rating of 1000 volts.

Of course, these tools are made of steel, so the non-conductive coating must be intact to do its job. Therefore, it is important to inspect your screwdrivers for damage before each use. This is not the tool to reach for when you need a makeshift pry bar, floor scraper, or hammer. Always use the right tool for the right job!

SPANNERS

DO WHAT YOU DO BEST EVERY DAY

"Hip Grip"

Teng Tools "Hip Grip" feature means the contact surface grips on the flat surfaces of the nut or bolt rather than on the corner. This helps to prevent damage and makes it possible to grip nuts and bolts which already have damaged corners.

Spanners come in various forms and are used to tighten and loosen nuts and bolts. Essential to any tool kit, spanners are available in metric and imperial sizes. Here are some useful tips on using spanners:

- Never force a spanner onto the head of a bolt or nut as this can damage the gripping edge of the spanner.
- Spanners are designed to be used with a reasonable amount of force, but be careful not to apply excessive force as this can result in the spanner slipping off the head of the bolt or nut causing injury.
- Never hit the handle of a spanner with a hammer to force movement.

COMBINATION SPANNER SET

10 Pieces mm

- 8, 10, 11, 12, 13, 14, 15, 16, 17, 19 mm
- Off set at 15° for easier use on flat surfaces
- Teng Tools hip grip design

Item ID: 6510A

Article Number: 117430108

ANTI SLIP COMBINATION SPANNER SET

12 Pieces mm

- 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19 mm
- Off set at 15° for easier use on flat surfaces
- Teng Tools hip grip design
- Anti slip design on the open end

Item ID: 8512A

TIPS

TALKING TORQUE

DOs

Use carefully

Torque wrenches are a measuring instrument and need to be treated with care.

Reset torque

After use set the torque to its lowest setting. If you don't over time the springs inside the wrench can lose their normal tension

Store safely

All torque instruments should be stored in their original case.

Keep wrench maintained

Torque wrenches should be cleaned and calibrated on a yearly basis.

DONT's

Use as a power bar

Torque wrenches should never be used as a power bar to shift stubborn fastenings.

Abuse your wrench

Do not drop your torque wrench or overload the wrench with a pipe extension

Store in conditions that lead to corrosion

Avoid any storage locations that are subject to high or low temperatures and high humidity.

Use without PPE

We recommend safety glasses when using any torque wrench or torque product.

MAKE THE RIGHT CHOICE

Teng Tools has become the first choice for many industrial users all over the world. Our unique 'Get Organised' system allows professionals to build a custom tool kit to suit their own individual needs.

Teng Tools has been used in the toughest environments around the world and is built to last. We offer a complete solution of high quality tools at a reasonable price. Our tools are used by companies that do not compromise on quality. Our extensive range offers an opportunity for buyers to find an optimal assortment with regard to quality, range and price.

BUILD THE ULTIMATE WORKSHOP

Store metal, pipe, and all raw materials as close to the entry point as possible.

Designate and area for rubbish and waste material to be disposed of.

Assign a clear workspace set convenient height for the type of work being done.

CLAW HAMMER WITH MAGNETIC NAIL HOLDER

- Double headed with a round pein and a claw for removing nails, etc
- Magnetic nail holder in the head for positioning nails on the first strike

ADJUSTABLE WRENCHES

WORKSHOP ESSENTIALS

ADJUSTABLE WRENCHES

- Integral measurement scale on the jaw
- Hole in the handle for tool securing when working at height
- Designed and manufactured to: ISO6787, ASME B.107.8M, DIN3117, BS6333, JISB4604 and SABS1211

Item ID:	Article Number:	Length:	Capacity:
4001	105870059	100mm	17mm
4002	105870109	150mm	24mm
4003	105870208	200mm	28mm
4004	105870307	250mm	33mm
4005	105870406	300mm	38mm
4006	105870505	375mm	50mm

A good quality adjustable wrench should be one of the first tools in your kit. The potential uses of an adjustable spanner are almost too numerous to mention but their key role is to give the user a firm tightening or loosening grip on multiple different sizes of fastener. This means that you don't have to swap for a different spanner every time you come up against a new nut, bolt or pipe section.

The moving jaws on these adjustable wrenches does not protrude allowing for use in confined spaces which is usually the main downside to using an adjustable wrench. Made from a high grade chrome vanadium steel with a black phosphate finish makes these wrenches durable and able to withstand the demands of any professional workshop.

RATCHETING PODGER WRENCHES

- Ideal for scaffolding, pallet racking, shelving systems and metal panel erection
- 2 sizes in one with 12 point double ended sockets

Item ID:	Article Number:	Sizes:
PGW1924	245200211	19 x 24mm
PGW2430	245200225	24 x 30mm

MECHANICS CREEPER

- L x W x H: 1050 x 500 x 155mm
- Six sturdy wheels and a strong construction
- Padded cushion with the Teng Tools logo

Item ID: TCA07
Article Number: 231350109

CAN YOU CUT IT?

Selecting the right cutting tool for the correct application is vital to complete any task safely and efficiently. From utility knives to tin snips and hacksaws to bolt cutters we have the tools you will need.

SCISSORS

- High carbon stainless steel blades for accurate cutting
- Cutting capacity of 22mm in soft materials
- Bi-material grip for added comfort

Item ID: 497

Article Number: 144140100

PROFESSIONAL QUALITY HACKSAW

- 12" Swedish steel M2 HSS 24 teeth blade for consistent quality
- Includes facility for presetting at a 45° or 90° cutting angles
